

Using the main branded elements, I've looked to create a professional document that highlights the key areas but doesn't look too cluttered, so the Core areas are easy to find and read at a glance, and pulling out other key info, like placement of the staff member etc. Subtle differences between each layout I will add the correct logos etc for your organisations. Let me know if you want certain areas pulling out.

VANTAGE

INDUSTRIAL AUTOMATION

Engineers That Keep Industry Moving Across the USA

At Vantage Consulting, we deliver the Automation Engineers who keep the USA's manufacturing and industrial operations running.

Our consultants live inside the automation market, partnering with system integrators, OEMs, and end users to supply critical engineering talent quickly, reduce hiring risk, and keep projects and production moving without delay.

Testimonials

"Vantage Consulting consistently delivers high quality automation engineers who integrate quickly and perform immediately."

"Their understanding of the automation market and speed of delivery makes them a trusted partner for our business."

"Vantage Consulting is a great asset to our business. They provided a lot of knowledge and exceptional candidates."

Our Core Specializations

Embedded Software Engineering (C, C++, RTOS, Linux)
 Firmware Engineering & Low-Level Development
 Electronics & Hardware Design Engineering
 PCB Design, Layout & Hardware Development
 Systems Engineering & Embedded Architecture
 FPGA, ASIC & Digital Design Engineering
 Verification, Validation & Test Engineering
 Product Development & R&D Engineering
 Applications Engineering & Technical Support
 Systems Integration & Technical Consulting
 Engineering Leadership & Executive Search
 RF Design, Antenna Design & MMIC

We support leading automation organizations including:

 SIEMENS

 MESCADA

 REVISYS

 LSELECTRIC

 audubon

 GMP Pros
A BETTER WAY FOR EVERYTHING™

 WM Wunderlich-Malec

 DELTA

 AWG AIR WATER GAS SOLUTIONS™

Industries We Support

Semiconductor & Electronics Manufacturing
 Automotive, EV & Autonomous Technology
 Aerospace & Defense Systems
 Consumer Electronics & IoT Devices
 Robotics & Intelligent Systems
 Medical Devices & Healthcare Technology
 Industrial Automation & Smart Manufacturing
 Telecommunications & Connectivity Technology
 Energy, Renewable & Power Systems
 Data Centers & Critical Infrastructure
 Engineering Consultancies & Technology Providers

Key Roles We Recruit

Embedded Software Engineer • Firmware Engineer
 Embedded Linux Engineer • Electronics Engineer
 Hardware Design Engineer • RF Design Engineer
 PCB Design Engineer • FPGA / Digital Design Engineer
 Systems Engineer • Verification & Validation Engineer
 Test Engineer • Applications Engineer
 Product Development Engineer • Engineering Manager
 Technical Lead / Principal Engineer
 Electronic / Software Technician

VANTAGE

EMBEDDED & ELECTRONICS

Engineering Talent Driving Innovation

At Vantage Consulting, we connect the USA's most innovative technology companies with the embedded software and electronics engineers driving modern products, devices, and intelligent systems. From firmware development and real-time systems to PCB design and hardware engineering, we deliver highly skilled professionals who accelerate product development and bring critical technologies to life.

With nationwide reach and global backing, our Embedded & Electronics division delivers engineers with precision and speed, supported by a strong interview conversion ratio and rapid time to hire, ensuring clients meet only the most relevant and technically aligned talent. In a market where product timelines define competitive advantage, Vantage Consulting delivers engineers who help businesses innovate faster, scale efficiently, and stay ahead.
